## Wolters Kluwer Health, Pharmacy OneSource to Showcase Medication Safety, Patient Care at ASHP Midyear Clinical Meeting

MINNEAPOLIS, MN - Dec 3, 2010 - [Wolters Kluwer Health](#), a leading global provider of information for healthcare professionals and students, today announced that it will highlight medication safety and patient care through its Facts & Comparisons eAnswers drug reference solutions at the 45<sup>th</sup> American Society of Health System Pharmacists (ASHP) Midyear Clinical Meeting. Also exhibiting at ASHP is Pharmacy OneSource, a leading healthcare Software-as-a-Service (SaaS) provider that helps hospitals manage the complex challenges of patient safety, compliance and efficiency. Wolters Kluwer announced on November 29th that it has entered into an agreement to purchase Pharmacy OneSource.

Featured in Booth #714 at the ASHP Midyear Clinical Meeting, Facts & Comparisons Clinical eAnswers provides students, residents and faculty with instant access to reliable, current drug information and medication management tools. For pharmacies, it addresses the key pain points of workflow efficiency and patient safety by providing the tools and information needed to support drug dispensing activities, including patient safety screenings for Drug Utilization Review and drug reference information.

In ASHP Booth #709, Pharmacy OneSource will feature its innovative performance improvement applications, including improved functionality for Senti7 clinical surveillance to help with infection prevention and antimicrobial stewardship, a new Label Module for the Simplifi 797 cleanroom compliance system, and VeriForm - the new checklist management application already adopted by 150 hospitals since its launch in April.

"The focus of the ASHP Mid-Year Meeting is medication safety and patient care," said Arvind Subramanian, President & CEO, Wolters Kluwer Health Clinical Solutions. "Given the recent announcement regarding Wolters Kluwer's pending acquisition of Pharmacy OneSource, the timing could not be more fitting. Following the completion of this acquisition, our combined offerings will provide comprehensive clinical decision support and tools to help hospitals, academic institutions and pharmacies reach these goals."
